Simple as Cycling

Circles O & Q intersect at F and G. AFC is a common secant. AB is tangent to circle Q, BC is tangent to circle O. BG crosses circle O at D. CD extended crosses AB at E. AE = 500.000', EB = 400.000'. What is the length of BC? ■

For the solution to this problem (and much more), please visit our website at: www.amerisurv.com. Good luck!

Dave Lindell, PS, retired after 36 1/2 years with the City of Los Angeles. He keeps surveying part time to stay busy and keep out of trouble.
