On the Cover

Kinematic laser scanning of tunnel and complete track geometry being captured in one pass by the Amberg Technologies GRP5000.

Features

- 10** **A Visit to Amberg Technologies**
New technology from a Swiss company will prove useful for the coming tunnel and rail infrastructure expenditures. These expenditures will offer surveyors an area of diversification.
By Marc Cheves, LS
- 24** **Refined Dimensions**
High-definition scanning helps redefine oil refinery fabrication.
By Seth Goucher and Brayden L. Sheive
- 30** **A Line Runs Through It: PLSC Supports New 40th Parallel Exhibit**
Art bisects history with a stone sculpture that commemorates the 40th parallel in Boulder, Colorado.
By John B. Guyton, LS
- 44** **ASTM E57: 3D Imaging Systems**
A status report from the NIST/ASTM committees that are establishing standards and specifications for laser scanning.
By Marc Cheves, LS
- 60** **A Teen's Lunar Quest**
An Alabma teen uses GPS to support her science fair project about lunar gravity.
By G.C. Skipper
