Features

- 10** **Henry Gannett, Father of Government Mapmaking**
Few individuals have impacted U.S. topographical map history more than this man, who brought horizontal and vertical datums to mapmaking.
By Jerry Penry, LS
- 22** **Fusing Measuring Innovations with Global R&D**
A symphony of effort has resulted in new technology for survey instruments.
By Marc Cheves, LS
- 34** **The Totalizer**
Tired of watching his expensive GPS equipment sit in the closet, this Virginia surveyor decided to do something about it.
By David Ingram, LS
- 40** **Scanning Deadwood**
To ensure that existing conditions were documented, a historic Old West town turned to scanning.
By Cyn René Whitfield
- 54** **Relative Positional Accuracy—Again**
Another explanation of what the ALTA/ACSM positional accuracy standards really mean.
By Gary Kent, LS
- 62** **The Surveying Inspired Art of Perri Lynch**
A Seattle artist takes the art of surveying to a whole new level.
By Gavin Schrock, LS

Departments

- 46** **Laser Scanning: Surveying Revolutionized with True Color 3D Scanning**
New technology allows high-accuracy determination of points that fall between the scan spacing grid.
By Marc Cheves, LS
