Features

- 10** **Measuring a Caribbean Disaster**
GPS surveying is providing geophysicists with key data toward understanding the Haitian disaster. The results of the research can help to reduce damage in future earthquakes.
By John Stenmark, LS
- 20** **3D-Laser Scanning and Surveying Collide**
High definition laser scanners have helped a Georgia company on projects from golf courses to mine shafts, as well as generate an entirely new line of business and client base.
By H. Tate Jones, LS
- 26** **Another Triumph!**
We've watched Javad Ashjaee innovate GNSS gear since the 1980s. He does it again with his latest, the Triumph VS.
By Marc Cheves, LS
- 52** **Comprehensive Collection**
Armed with an advanced mobile mapping system, a geospatial data content provider undertakes ambitious project inventorying rural utility assets throughout the U.S.
By Don Talend

Departments

- 44** **Product Review:**
Hemisphere GPS R220
This full-featured GNSS unit can also be used with OmniSTAR for lower accuracy work such as wetland and flood plain mapping
By Shawn Billings, LS
